## SALIENT FEATURES

ISO 9001 : 2015

We deliver consistent quality products as per ISO standardization.

For Stainless Steel Sinks. Except Accessories and Complements. Conditions apply.

### TOPMOUNT SINKS

Top - mount sinks are installed into a kitchen counter - top so that a uniform working surface is created. Thin, and almost unnoticeable rims allows quick and easy cleaning. The installation is as simply as just put the sink from above into each type of kitchen counter - top.

### UNDERMOUNT SINKS

Under - Mount sinks are installed into counter - top from below. Absence of seams between sink and counter- top contributes to simply hygiene maintenance and over all appeal of a kitchen.

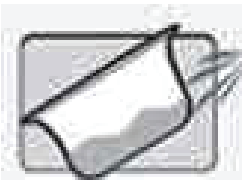

### INSET SINKS

With stylish details to the top edges, Futura inset sinks can be easily installed. It's simply about cutting a hole into your counter - top surface and mounting the sink with the clips provided.

Combination of Innovative design with traditional excellence.

Sound absorbing pads reduce the vibration and sound emitting from the sink when it is filled.

Futura latest technology and high-precision machines allow the manufacture of large and deep bowls for greater functionality, usability and durability.

Futura undercoating solution protect the sink from wet-rotted situation, as well as further make the sinks noticeably quiet.

The exposed surfaces are hand blended to a lustrous highlighted satin finish.

Highest quality sink formed from 18 guage, type 304 nickle bearing stainless steel.
